HAMMOND RANCH | ROW CROP FARM

GROSS ACRES
102.71

FARMABLE ACRES
100.00

This efficient tract of cropland is currently farmed to vegetables and was previously a citrus grove for many years. The tract is located toward the south end of the Coachella Valley but north of Highway 111 and it is adjacent to vegetable, citrus and table grape farms. An on-site reservoir covers approximately 1.4 acres along the northern boundary. Property is leased to a vegetable grower at a strong rate.

HIGHLIGHTS

- Fertile Class 2 and 3 Soils
- Adjacent to vegetables and permanent plantings
- Ag Preserve contract limits property taxes

COACHELLA VALLEY OVERVIEW

Southern California's Coachella Valley is located in southern central Riverside County to the north of the Salton Sea and southeast of Palm Springs. Riverside County produces over \$1 billion in agricultural commodity value annually and Coachella Valley typically represents about half of that value despite only accounting for about one third of the county's acreage; this shows that the Valley produces many of the county's most valuable crops. Often considered a smaller version of California's Central Valley, the Coachella Valley has about 59,000 acres in production and total gross agricultural production value of about \$575 million. Given its excellent climate and ample water from the Colorado River, the Valley produces a wide array of fruit and vegetable products with early market timing as summarized in the table to the right.

Coachella Valley Water

The Coachella Valley Water District (CVWD) serves the majority of the Valley's wide array of both permanent plantings and row crops. CVWD water is delivered from the Colorado River via the 123 mile Coachella Canal, a branch of the All-American Canal. The district has an underground delivery system with approximately 500 miles of piping. Reportedly over 60% of CVWD farms use drip or other micro-irrigation, which conserves water, allows in-line fertilizer, and increases yields.
