62ND AVENUE RANCH | ROW CROP FARM

GROSS ACRES

79.17

FARMABLE ACRES

72.00

This parcel is situated at a higher elevation on the Mecca Slope and is currently used as a row crop farm. The property's aspect, topography, and available water make it well suited to an array of vegetable crops or permanent plantings. The site houses a 1.0 acre reservoir with a filter station for distribution of its CVWD water.

HIGHLIGHTS

- Higher elevation of the Mecca Slope allows for early crops
- Surrounded on all sides by tree and vine crops
- Includes on-site reservoir and filter station

COACHELLA VALLEY OVERVIEW

Southern California's Coachella Valley is located in southern central Riverside County to the north of the Salton Sea and southeast of Palm Springs. Riverside County produces over \$1 billion in agricultural commodity value annually and Coachella Valley typically represents about half of that value despite only accounting for about one third of the county's acreage; this shows that the Valley produces many of the county's most valuable crops. Often considered a smaller version of California's Central Valley, the Coachella Valley has about 66,000 acres in production and total gross agricultural production value of over \$590 million. Given its excellent climate and ample water from the Colorado River, the Valley produces a wide array of fruit and vegetable products with early market timing as summarized in the table to the right.

Coachella Valley Water

The Coachella Valley Water District (CVWD) serves the majority of the Valley's wide array of both permanent plantings and row crops. CVWD water is delivered from the Colorado River via the 123 mile Coachella Canal, a branch of the All-American Canal. The district has an underground delivery system with approximately 500 miles of piping. Reportedly over 60% of CVWD farms use drip or other micro-irrigation, which conserves water, allows in-line fertilizer, and increases yields.
